

T.E.A.M. Career Communication™

Alignment & Student Outcomes

Designed for School Priorities

T.E.A.M. Career Communication™ supports the skills schools are expected to develop—without adding complexity to existing programs.

Core Skill Areas Supported

Communication

Students understand how they communicate and how to adjust based on the situation and audience

Collaboration

Students learn to work more effectively with different personalities and communication styles

Self-Awareness

Students gain insight into their strengths and behavioral tendencies

Career Readiness

Students connect personal communication patterns to workplace expectations and roles

Alignment with Common School Frameworks

Supports key elements found in:

- Career & Technical Education (CTE) programs
- Employability / workplace readiness standards
- Social-emotional skill development (self-awareness, relationship skills)
- College and career readiness initiatives

(It's designed to complement—not replace—existing curriculum)

Observable Student Outcomes

Educators can expect to see:

- More balanced and effective group work
- Improved communication between students
- Increased student participation and engagement
- Better understanding of strengths in academic and career contexts
- More thoughtful discussion of career direction

Practical, Not Theoretical

- Built from real-world leadership and workplace training
- Focused on behaviors students can recognize and apply
- Designed for immediate use in classroom and team settings
